

#5...Aug 14, 2019

We have some good news: the GWI application for a low-interest loan to build high speed internet (fiber to the home) in Brooksville is targeted to be submitted very soon - anticipated date is Sept 6.

After the application is submitted, of course there will be a lengthy review process by the USDA before funds are allocated and construction can commence.

But we will be one important step further along. Keep your fingers crossed.

And thank you to all (more than 140 people!) who answered the call in July to re-submit your online survey. I'm sure it helped!

If you have any questions, or further info about your current internet service (or lack thereof), please email or phone the undersigned.
