

# Broadband Briefing for Brooksville Selectmen

June 16, 2021

by Abbie McMillen  
co chair, Brooksville Broadband Committee

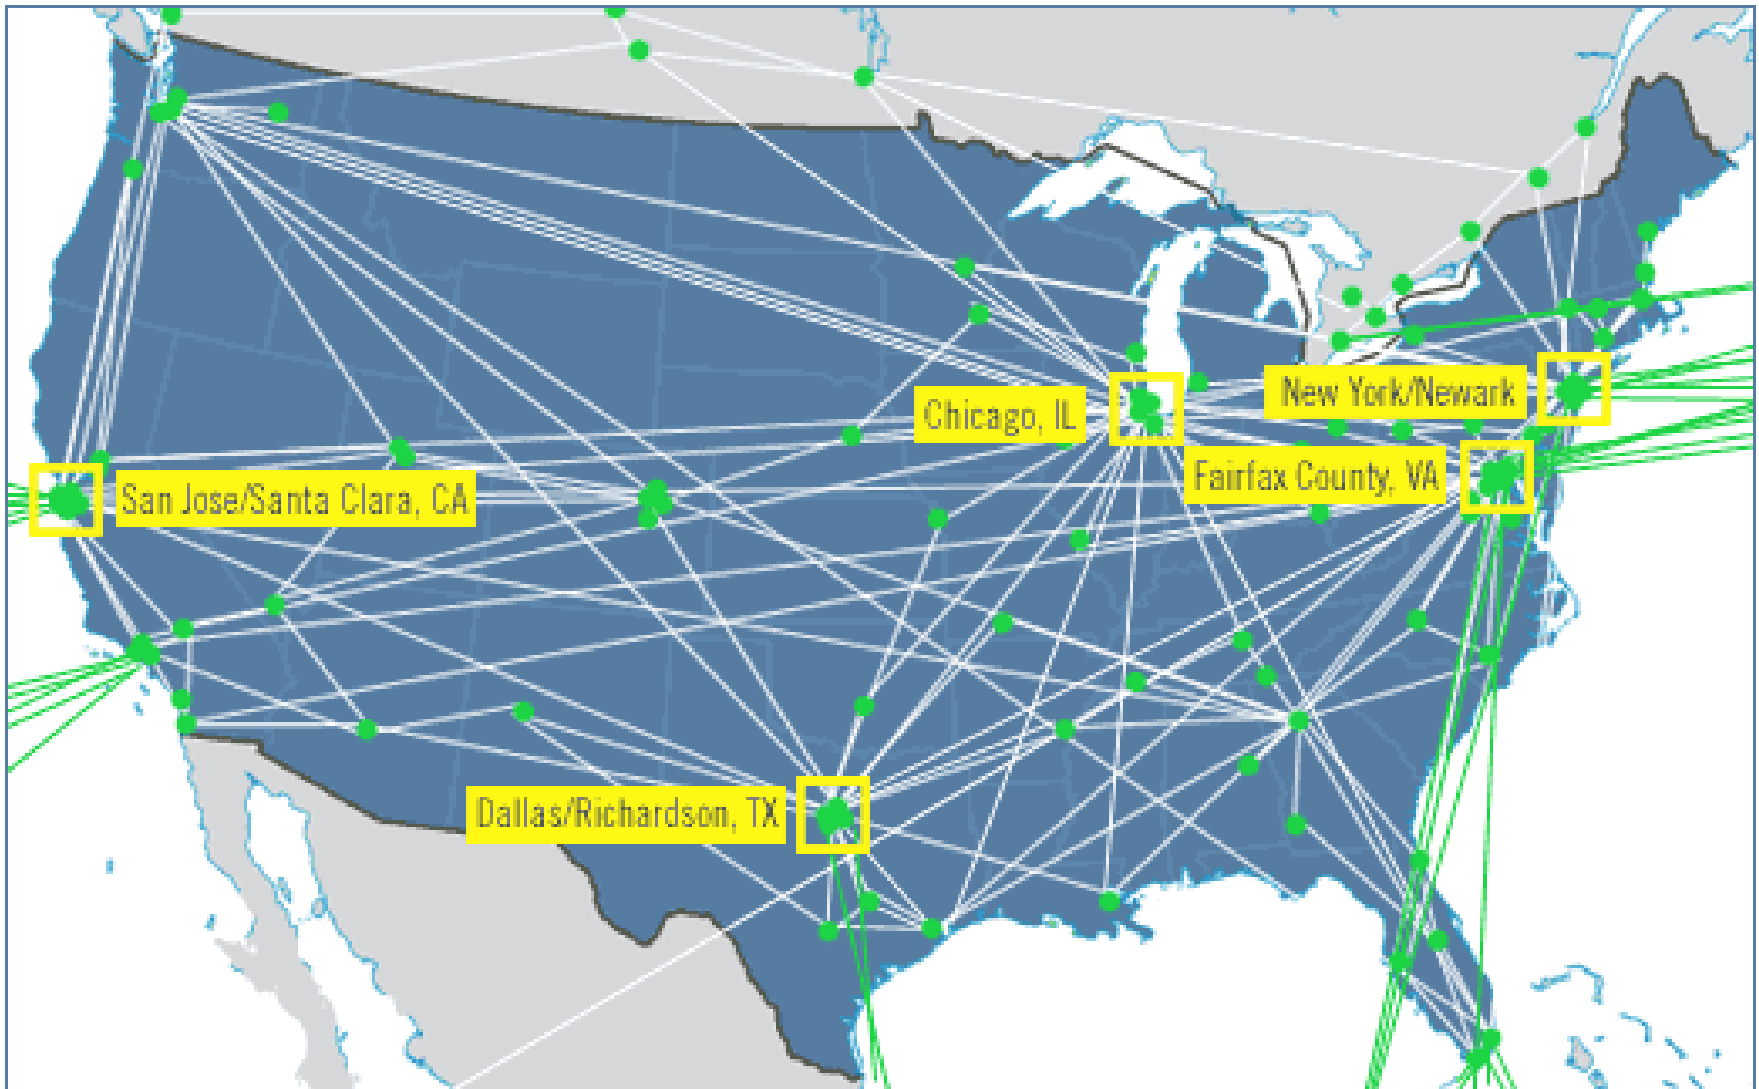

## **Undersea fiberoptic cable map 2018**

Science News, June 14, 2018

A signal can circle the globe on fiberoptic cable in about 2/10ths of a second.  
Light travels through cable about 30% slower than through a vacuum. Still, that's plenty fast!
